

Supply Chain Transparency Statement

2025

Brooks Sports, Inc.'s Statement on Australia Modern Slavery Act, California Transparency in Supply Chains Act, UK Modern Slavery Act, the USA Tariff Act, and Canada's Fighting Against Forced Labour and Child Labour in Supply Chains Act

We are committed to continually improving our practices to ensure there is no slavery, forced labour, child labour, or human trafficking in our supply chain. The following outlines Brooks' efforts to identify and eliminate forced labour, in all its forms, from our business and supply chain. It is reviewed annually and updated as needed.

California Transparency in Supply Chains Act

Effective January 1, 2012, the California Transparency in Supply Chains Act of 2010 (SB 657) requires companies that sell goods in California to make certain disclosures regarding their efforts to address slavery and human trafficking within their supply chain.

Canada's Fighting Against Forced Labour and Child Labour in Supply Chains Act (Canadian Supply Chains Act or S-211)

Effective January 1, 2024, S-211 requires companies that do business in Canada and have at least 250 employees, generate at least CAN\$40 million in global revenue, and have at least CAN\$20 million in global assets to report on the steps they have taken to reduce forced labour and child labour in their supply chains.

UK Modern Slavery Act

Effective October 29, 2015, the UK Modern Slavery Act of 2015 requires companies that sell goods in the UK and have an annual turnover of over £36 million to make certain disclosures regarding their efforts to address slavery and human trafficking within their supply chain.

Australia Modern Slavery Act

Effective January 1, 2019, the Australia Modern Slavery Act of 2018 requires companies with annual sales over AU\$100 million to make certain disclosures regarding their efforts to address slavery and human trafficking within their supply chain.

USA Tariff Act

Section 307 of the Tariff Act of 1930 (19 U.S.C. § 1307) prohibits the importation of merchandise mined, produced, or manufactured, wholly or in part, in any foreign country by forced or indentured child labour—including forced child labour. Such merchandise is subject to exclusion and/or seizure, and may lead to criminal investigation of the importer(s).

Introduction

Here at Brooks, as stewards of the running community and as global citizens, we are committed to creating positive change and being transparent about areas where we can do better.

Brooks Belief

We believe in a world where everyone is welcome to run and has a place to do it. That means making progress along our People and Planet Path to champion the run for all and protect the planet we run on. Our commitments start with people, and we value safety, dignity and opportunity for all. And because 150 million people run outside, it's critical we take care of the world we share.

We continually evolve our Running Responsibly program to deliver on social and environmental commitments, especially pertaining to fair, safe and equitable working conditions throughout our supply chain.

The following supply chain transparency statement details many of the initiatives we've put in place to support our belief that there is no place for forced labour, child labour, modern slavery, or human trafficking in our business or supply chain. For Brooks, when it comes to such topics and their impact on people, vigilance and clear policies are imperative.

This statement has been approved by the officers of the corporate entity of Brooks Sports, Inc. (Brooks) and signed on behalf of Brooks by Dan Sheridan, CEO. This confirms that the CEO is legally authorized to bind the company and that the officers of the corporate entity for Brooks have considered and approved the statement for fiscal year 2025.

Sincerely,

A handwritten signature in black ink, appearing to read "Dan Sheridan".

Dan Sheridan
CEO, Brooks Sports, Inc.

Introduction to Our Business

Brooks Running sells its performance footwear, apparel, sports bras, and accessories in more than 50 countries worldwide. Brooks' purpose is to inspire everyone to run their path, by creating the best gear, tools, and experiences. Founded in 1914, Brooks is a subsidiary of Berkshire Hathaway Inc. and is headquartered in Seattle, with subsidiaries located in Canada, Europe and Asia.

Brooks contracts the manufacturing of its best-in-class footwear and apparel products to a small number of select suppliers around the globe. Our [Global Factory List](#) can be found on our website. The length of our relationship with our Tier 1 footwear suppliers is, on average, more than 15 years.

Policies

We ground ourselves in the Universal Declaration of Human Rights and the International Labour Organization Declaration on Fundamental Principles and Rights at Work. We also align our policies and standards with international best practices including the [Fair Labor Association](#) (FLA), the [Ethical Trading Initiative](#) base code and the [Business Social Compliance Initiative](#) (BSCI).

The Brooks [Supplier Code of Conduct](#) is the foundation of Brooks' Corporate Responsibility program. Together with local law and international labour standards, it sets the standards for all factories in our manufacturing supply chain. The Code is organized around five principles:

- Transparency and collaboration
- Compliance with local and international laws and regulations
- A safe and healthy working environment
- Fair compensation
- Environmental management

The Brooks Supplier Code of Conduct is part of the purchase agreement and must be signed by all suppliers manufacturing Brooks products and materials to ensure a common vision, accountability, and transparency.

Brooks' Supplier Code of Conduct bans suppliers from charging "any employment eligibility fees for migrant workers, including recruitment fees" and calls for suppliers to "adopt policies and procedures to ensure there is no forced labor or human trafficking in the Brooks supply chain".

Additionally, in 2018 Brooks was a founding signatory to the [American Apparel and Footwear Association](#) and FLA's [Commitment to Responsible Recruitment](#), and in 2023, we signed the updated commitment. This commitment aims to unify the footwear and apparel industry around the following tenets of responsible recruitment:

- No worker pays for their job.

- Workers receive a timely refund of fees and costs paid to obtain or maintain their job.
- Workers retain control of their travel documents and have full freedom of movement.
- All workers are informed of the basic terms of their employment before leaving home.

Evaluating and Managing Risks

Visibility into the factories, none of which we own or operate, that manufacture Brooks products, materials, and raw materials is critical to ensure the responsible sourcing standards outlined in our Supplier Code of Conduct are upheld. In 2022, we invested in a software solution called TrusTrace to help us continuously discover and trace factories throughout the Brooks manufacturing supply chain.

In alignment with our seasonal business, twice a year we request that our Tier 1 and Tier 2 suppliers identify Tier 3 and Tier 4 suppliers they use for the manufacture of some Brooks products. Information about their facilities and production is collected to help us understand their role in our manufacturing supply chain. Tier 1 and Tier 2 suppliers are then requested to use purchase orders to substantiate their disclosed supply chains and submit documents that track the origin, movement, and handlers of materials and styles.

With this broad view of our manufacturing supply chain, we then identify the suppliers and factories that are involved in producing a particular style. Our approach is to trace new and priority styles entering the market in a given season. For each style, we prioritize tracing key materials and components that make up the majority of that style's weight. We ask suppliers to trace each material and component to the raw material level, giving us deep visibility into the manufacturing supply chain of the product.

This deep supply chain visibility is also used to help identify and mitigate responsible sourcing risks, increase due diligence for customs compliance, and identify business continuity risks. Our traceability program is designed to leverage intelligence tools to quarterly screen known suppliers, Tier 1 through Tier 4, to help ensure that all known suppliers are in compliance with U.S. and international trade regulations. For any identified risks, we collaborate closely with suppliers to assess the relevance and impact of the risk and take actionable steps to remediate issues. Any significant risks that cannot be remediated will result in termination of business.

Brooks also evaluates risk across our supply chain by reviewing social responsibility assessment results and the Department of Labor's "List of Goods Produced by Child Labor or Forced Labor". Brooks recognizes the following high-level risk areas specific to the countries in which we operate, the industry we are in, and our own supply chain, to which we pay extra attention during our due diligence and verification processes:

- Foreign migrant labour
- Freedom of movement
- Right to refuse overtime
- Workers' right to leave job

- Cotton production

In monitoring for these risks, our Responsible Sourcing program identifies and remediates any non-compliance with local law or our Supplier Code of Conduct as highlighted below.

Supply Chain Due Diligence and Verification

Through our Responsible Sourcing program, the following steps are taken to enforce our Supplier Code of Conduct across the supply chain so that working conditions are fair, safe and equitable.

New Supplier Onboarding

As part of our new supplier onboarding process, Brooks requires all factories to sign the Brooks Supplier Code of Conduct, certifying that:

- they meet or exceed the requirements in the Brooks Supplier Code of Conduct;
- they will maintain current and detailed records to substantiate compliance with the Brooks Supplier Code of Conduct;
- they will be transparent with Brooks in all respects, including all documents, such as accurate working hours and payroll records;
- any Brooks merchandise will be produced in compliance with the wage and working hours laws of the country of manufacture and without the use of child, prison, or forced labour; and
- they understand that failure to comply with the Brooks Supplier Code of Conduct may result in termination of business with Brooks.

Additionally, Brooks requires all prospective factories to complete a verified social compliance assessment to evaluate social and labour practices and verify compliance with our Code.

Code of Conduct Compliance

In 2021, as a [Cascale](#) member and a signatory of the [Social & Labor Convergence Program \(SLCP\)](#), we aligned with the apparel and footwear industry by adopting the SLCP Converged Assessment Framework (CAF) and replacing our traditional third-party audit approach. This industry-standardized tool measures social and labour practices in factories across nine key areas:

- Recruitment and hiring
- Working hours
- Wages and benefits
- Worker treatment
- Worker involvement
- Health and safety
- Termination

- Management systems
- Empowering people and communities

The assessment can be shared with brand partners via Worldly. The SLCP has also collaborated with Better Work, an International Labour Organization program that assesses compliance with international labour laws to improve working conditions. This collaboration means that Better Work will use the SLCP CAF assessment during their assessments to reduce audit fatigue and promote data sharing in the industry. As Cascale members, we encourage our factories to use Worldly to complete the SLCP assessment through the Higg Facility Social & Labor Module (Higg FSLM). However, we also accept the SLCP report through Better Work. This ensures that we are doing our part to help reduce duplicative auditing and costs for our suppliers.

The SLCP CAF evaluation begins with a self-assessment completed by the factory, that is subsequently verified by an SLCP-approved verifier to confirm that assessment questions were understood, and answered correctly, and that the data is reliable. During the verification process, independent and approved verifiers review the factory's responses and conduct semi-announced on-site verification, which includes an opening and closing meeting, document review, factory employee interviews, and a facility walk-through. With industry adoption of this tool, duplicative auditing is eliminated, and brands can collaborate with their shared factories to use one data set to drive social and labour improvements in their supply chains.

Once factories are successfully onboarded, we evaluate 100% of our Tier 1 final assembly factories' continued compliance with our Supplier Code of Conduct and local law through the use of a verified social compliance assessment. We use a risk-based approach to determine our engagement level with Tier 2 material suppliers, prioritizing our engagement with factories that account for at least 80% of our materials volume by spend.

Worker Grievance Investigation

Workers at any Brooks factories can file grievances directly with the Brooks Responsible Sourcing team through our established grievance system. Whenever any grievances are received, Brooks performs an investigation to understand the full context of the complaint. Following the investigation, should any violations of local law or our Supplier Code of Conduct be identified, Brooks will work with the factory to remediate the issue. Once remediation has been complete, Brooks requires suppliers to communicate to workers what the issue was and what was done to remediate it. If not submitted anonymously, Brooks will also follow up directly with any workers who filed a grievance to ensure that they receive the results of the investigation, they understand the remediation efforts that were taken, and that they agree with the results of the process.

Measurement Tools

Brooks uses third-party risk management software and industry tools, including the SLCP CAF, Better Work, Higg Index FSLM and Higg Index Facility Environmental Module (FEM) to measure compliance with our Supplier Code of Conduct.

Remediation Process

Following the completion of a verified social compliance assessment, we work closely with factories on a Corrective Action Plan (CAP) to remediate any identified issues that do not meet our standards. In the spirit of continuous improvement, we rate factories twice throughout the CAP process. The assessment is rated following verification, and the CAP is rated after the factory has been given two opportunities to show improvements. The CAP rating identifies factories that are properly remediating all issues found and informs us if any factories are not properly conducting remediation. We believe that rating factory CAPs helps to foster a transparent relationship, motivate factories to sufficiently remediate identified issues and give the factories an opportunity to explain any potential misunderstandings.

There are three kinds of ratings a factory can receive on its annual assessment: Compliant, Needs Improvement, and Demands Immediate Action. If a factory receives a Compliant rating, no issues were found in its latest verified social compliance assessment. If a factory receives a Needs Improvement rating, one or more non-critical issues were found in its latest verified social compliance assessment. If a factory receives a Demands Immediate Action rating, at least one critical issue was found during its latest verified social compliance assessment. We identify a critical issue as a high-risk non-compliance with our Code and/or local and national laws and regulations that compromise the basic human rights of a factory employee. All issues related to forced and child labour are considered critical findings. If a critical issue is found and a factory receives a Demands Immediate Action rating, Brooks will immediately set up a meeting with the factory to discuss the issue, understand the root cause and work together to implement a solution to quickly remediate the issue and prevent it from occurring in the future. Factories who refuse or fail to remediate any critical issues found risk termination of business with Brooks.

Accountability

Brooks has a dedicated team responsible for our Responsible Sourcing program. The Brooks senior leadership team has direct involvement and accountability in supporting our commitment to human rights. The Responsible Sourcing team briefs the relevant sourcing team leader after each social compliance assessment.

The Brooks Responsible Sourcing team participates in seasonal business reviews with all footwear factories. During these reviews, Brooks evaluates a factory's corporate responsibility performance, as well as other business metrics, such as development and commercialization. The Responsible Sourcing team uses this process to engage both Brooks and factory leadership about any ongoing remediation efforts.

Training

Internal Training

Our Responsible Sourcing team receives regular training on the subject of migrant labour, forced labour, child labour, and human trafficking. This training includes a review of the U.S. Customs and Border Protection Forced Labor webpage, the Department of Labor's "List of Goods Produced by Child Labor or Forced Labor" and "Reducing Child Labor & Forced Labor Toolkit" webpage, and the International Labour Organization's "Indicators of Forced Labour" booklet.

Additionally, to educate other Brooks employees on the importance of monitoring labour conditions throughout the year, we require employees who frequently interact with and/or visit our supply chain factories to complete a forced labour course. This course, "Human Trafficking: Forced Labor Training for Global Supply Chains", was created by the International Trade Administration and aims to educate employees on human rights laws and regulations, and how to identify and report signs of forced labour.

Supplier Training

Brooks or third-party specialists perform in-person trainings for our suppliers on topics relevant to each individual supplier. Each new supplier is trained on our Supplier Code of Conduct and Responsible Sourcing Standards. Our Supplier Code of Conduct has been translated into eleven languages to make it more accessible to workers within our supply chain. Additionally, in 2019, Brooks held a Migrant Labour workshop in Taiwan and invited multiple factories, to train them on Brooks' expectations and red flags. We collaborate with several non-governmental organizations and auditing firms to raise awareness of social responsibility issues. We regularly monitor reports and follow developments in the industry from groups, such as the Fair Labor Association, International Labour Association, Cascale, and the Better Work program.

Assessment of Effectiveness

In 2024, Brooks identified non-compliances, such as minor health and safety issues, at final assembly factories and materials suppliers, and has successfully remediated or closed CAPs for 100 percent of the factories. None of these instances of non-compliance were related to forced labour, modern slavery, human trafficking, or child labour.

Further Steps

For more information regarding our Corporate Responsibility Program, please see the Running Responsibly page on www.brooksrunning.com and our current [Corporate Responsibility Performance Report](#).
